The science of morality may refer to various forms of ethical naturalism grounding morality in rational, empirical consideration of the natural world. It is sometimes framed as using the scientific approach to determine what is right and wrong, in contrast to the widespread belief that "science has nothing to say on the subject of human values".

Golden Rice was engineered from normal rice by Ingo Potrykus and Peter Beyer in the 1990s to help improve human health. Golden Rice has an engineered multi-gene biochemical pathway in its genome. This pathway produces beta-carotene, a molecule that becomes vitamin A when metabolized by humans. Ingo Potrykus worked at the Swiss Federal Institute of Technology in Zurich, Switzerland, and Peter ...

In Kant's words, "the 'I think' must be able to accompany all my representations" (Kant 1781/1787: B132; Keller 1998; Kitcher 2011; see the entry on Kant's view of the mind and consciousness of self). Thus, while Kant denies that there is an inner awareness of the self as an object that owns its experiences, we must nevertheless be ...

History. Learn more about the subject of history, which is broadly defined as the study of past events. Due to the broad nature of the concept, most historians narrow their scope by focusing on a particular time period, a particular country or region, a particular person, group, or individual person,

a particular theme, or any combination of those categories.
