laser is an acronym (an abbreviation which uses the first letter of each word in a description to create a term.) Laser (L-A-S-E-R) stands for light amplification by stimulated emission of radiation. In simpler terms, a laser is a single-wavelength (one color of light) source of high-energy light, which can be accurately focused to transmit

## Procedures In **Cassileth**

Photorejuvenation is a skin treatment that uses lasers, intense pulsed light, or photodynamic therapy to treat skin conditions and remove effects of photoaging such as wrinkles, spots, and textures. The process induces controlled wounds on the skin, prompting it to heal itself by creating new cells. This process reverses the signs of
