A transforming mech can transform between a standard vehicle (such as a fighter plane or transport truck) and a fighting mecha robot. This concept of transforming mecha was pioneered by Japanese mecha designer Shōji Kawamori in the early 1980s, when he created the Diaclone toy line in 1980 and then the Macross anime franchise in 1982.

Sometimes, you may want to write an especially long line, potentially containing many macros. This may not be particularly readable in the passage editor, though. One piece of markup that may help you is the mark - placing it just before a line break, or just after it, will cause the line break to be removed from the passage, thus “joining together” the lines.

If you want some text to show up exactly as you write it, without Markdown doing anything to it, just indent every line by at least 4 spaces (or 1 tab). As an alternative to indenting, you can make a code block use 3 or more tildes (~) or backticks (`) on a line before and after the text (syntax details).
