Nikon Microscope Documentation

The Optiphot line was one of the primary instruments used in the integrated circuit manufacturing process, with excellent episcopic illumination capabilities, and an increasingly large capacity lineup, including the models 66 , 88, 200 and 300, which had stage ranges of 6x6" (~150 mm), 8x8" (~200 mm), 200 mm and 300 mm, for the increasingly ...

Nikon Optiphot Series Microscopes

Nikon Microscopes Models Review: Optiphot, Labophot Eclipse 50i and E100. From the time the first Nikon compound monocular microscopes were produced in 1917, Nikon microscopes continued to evolve over the next seven decades; in the late 1970s and early 1980s, they introduced the Optiphot and Labophot models. Many labs and schools still choose to use these older, durable models.
